

Helping industry with technical
solutions, products and services

**CHRISTIAN
BERNER**

Expect more

We'll find the technical solution you need.

Christian Berner is a technology trading company operating on the Nordic market.

Our way of providing value to customers and suppliers is by simplifying purchasing and sales and supplying knowledge and services. We help industrial companies to develop solutions that streamline their production processes.

Quiet environments

We can help to insulate against vibrations, structure-borne sound, impact sound and other noise with vibration-damping material. This could be damping for machinery, buildings or rails.

Clean water

Access to clean water is a necessity in every community. Christian Berner supplies UV units, among other things, to guarantee safe water supply for millions of residents. When the parasite *Cryptosporidium* infected the drinking water in Östersund, Christian Berner was quick to supply purification systems.

Sustainable products

We need to stop overtaxing the earth's finite resources. Therefore we offer systems and components that make it possible to create new products from renewable raw materials. A paper mill in Finland that develops bio-based products selected Christian Berner as a total partner for their new system solutions.

Sustainable production

Improving the efficiency of the production process makes it sustainable. The results can include lower energy consumption, less wastage and a long service life for production systems and end products. Coating the inside of containers with plastic to reduce friction is one example. Or developing a fast and smart packaging machine for e-commerce.

Extensive experience

The company was originally founded by 20-year-old Norwegian Christian Berner, who set up operations in Sweden in 1897 to import and develop technical solutions for the brewing industry in Gothenburg. Since then we have been responsible for development of technical solutions and serving as a link between customer requirements and product development.

“We improve environments that affect many people”

Our customers operate primarily within

- Construction & infrastructure
- Petrochemistry & refineries
- Food & pharmaceuticals
- The engineering industry
- Paper & cellulose
- Environmental technology
- Public sector

Instruments and analysis

Measuring instruments for laboratories, in the field and online.

Disinfection systems

UV and ozone installations and dosing systems.

Packaging and filling

The right machine or line for your specific product.

Powder and drying technology

Equipment for mixing, sifting, grinding or compacting, drying or moistening.

Liquid technology

Equipment for mixing or separating, wet grinding or homogenizing, extracting or evaporating.

Pumps

Dosing and hygienic transfer pumps for the food and pharmaceutical industries.

High-pressure pumps

The latest within industrial use of high-pressure water.

Filter technology

A wide range of filters for the process industry, lab and marine applications.

Steam, gas and energy technology

Systems for the power and process industries.

Paper technology

Solutions for the entire paper-making process.

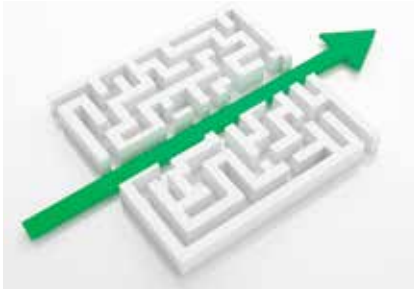

Technical plastic

Semi-finished and finished components of high-quality plastic material and construction plastic.

Vibration technology

Insulating against vibrations, structure-borne sound, impact sound and other noise.

Collaboration with our suppliers

We seek out top-quality products from leading manufacturers in Europe and the USA.

We collaborate closely with our suppliers and are therefore in the know with regard to product innovations, and since we are familiar with our customers' requirements we can strive to influence manufacturers' development work in a relevant direction.

So we are forging a straighter and faster path to cost-effective production.

Christian Berner Tech Trade AB (publ.)

The operations in the Nordic region come under the parent company Christian Berner Tech Trade AB, which is listed on Nasdaq Stockholm.

Net sales for 2016: SEK 430 million

Number of employees: 130

CEO: Bo Söderqvist
